NorEast.:R32 @ Shenandoah

Category - [Open Track](#)
2007-05-19

This was the second event ran by the Capitol Are North East .:R32 club and assisted by NASA-Mid Atlantic. This was a HPDE only event, no racing. Since it was put on by a VW club there were mostly VW's in attendance. I was asked to help instruct at this event since all the advanced run group spots were filled and I wanted to test out the 'new' mustang.

Removal Of Cage

Category - [Safety/Cage](#)
2007-03-18

The cage for Slimer is being donated by the 007, this project was removing the cage from 007. A Harbor Freight Recip saw was lost in the removal process, but a Milwaukee was added to the family, and it was a WELCOMED addition!

IRS Swap

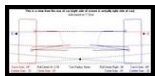

Category - [Suspension](#)
2006-09-22

I purchased another mustang to keep on hand as a spare and with that came a built 8.8 solid axle. It had Moser 31 Spline axles, moser spool, c-clip eliminators and 3:73 gears. Since I already have a solid axle and most of the components in this one would be of no use to me on a road course I decided to swap it with someone for an IRS. I found an owner of an 04 Cobra locally ...

Front End Repair

Category - [General Build](#)
2006-09-10

As I am sure you saw the front end of Slimer has seen better days. My plans for the front end are to cut out the bad, fix the sides so the fenders line up and the suspension points are straight then fabricate a new radiator core support. I plan to stuff the largest size radiator I can get in that space in there and tilt it forward. This should increase air flow to the radiator and provide some aer...

Teardown of Slimer

Category - [General Build](#)
2006-09-03

To start off the build of the New AI car I purchased a shell from a guy in New York (thanks Jorge). The car had minor front end damage and would need a new Radiator Support. The 1/4's, doors and roof was straight, just what I was looking for. My good friend Pete brought up his open trailer and rode with me to pickup the car. The drive was j...
